Composition:
Carbasalate Calcium BP 76.32 gm (Equivalent to 60 g of Acetylsalicylic acid) and Sodium Ascorbate USP 7.48 gm (Equivalent to 6.65g of Ascorbic acid)

Mode of Action:
Carbasalate Calcium is a 1/1 complex of calcium acetylsalicylate and urea. Compared to aspirin (acetylsalicylic acid) Carbasalate calcium is soluble in water, allowing a better dissolution and therefore a higher therapeutic effect. Aspirin is well known for its effect against pain, fever and inflammation.

Salicylates alleviate pain by virtue of a peripheral action; direct effects on the CNS also may be involved.

Salicylates usually lower elevated body temperatures rapidly and effectively. However, moderate doses that produce this effect also increase oxygen consumption and metabolic rate. In toxic doses, this compound have a pyretic effect that results in sweating; this enhances the dehydration that occurs in salicylate intoxication.

Vitamin C, a water soluble vitamin, may stimulate the body defences and complete aspirin action.

Indication:
Renaspirin is indicated for antipyretic, analgesic and anti-inflammatory effect on Poultry, Horses, Calves, Lambs, Swine, Dog

Dosage & Administration:
Oral, in drinking water or liquid feed:
30-40 mg of acetylsalicylic acid per kg and per day, corresponding to:

Poultry : 0.5 g per liter of drinking water for 2-3 consecutive days.

Calves, lambs, horses, swine & dogs:

<table>
<thead>
<tr>
<th>Body weight</th>
<th>Dose</th>
<th>Duration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 50 kg</td>
<td>0.5 - 3 gm</td>
<td>2-3 consecutive days</td>
</tr>
<tr>
<td>50 - 150 kg</td>
<td>3 - 8 gm</td>
<td>2-3 consecutive days</td>
</tr>
<tr>
<td>Above - 150 kg</td>
<td>8-30 gm</td>
<td>2-3 consecutive days</td>
</tr>
</tbody>
</table>

Contraindication:
The plasma concentration of Salicylates generally is little affected by other drugs, but concurrent administration of aspirin lowers the concentrations of indomethacin, naproxen and fenoprofen.

Adverse Effects:
Dizziness, drowsiness, vomiting and occasionally diarrhea.

Precautions:
Stop treatment in case of digestive disturbance.

Supply:
10x10g Sachet
10x50g Sachet
